Network latency estimation and prediction
Analytical / protocol estimators
Network distance estimation
Measurement studies (queueing / bufferbloat)
Machine-learning prediction
Delay components
prop + trans + queue + proc
TCP SRTT / RTTVAR
(Jacobson, RFC 6298)
Karn's algorithm
Landmarks: IDMaps, King
Coordinates: GNP, Vivaldi
Matrix factorisation:
IDES, DMFSGD
Gateway & access:
Sundaresan et al.
Latency variation:
Høiland-Jørgensen et al.
Queue control: CoDel, BBR
Classical ML: SVR, HMM,
RF / gradient boosting
Deep learning: LSTM,
Transformer, GNN
Cellular: Lumos5G,
4G/5G datasets
Evaluation layer: chronological (forward-chaining) splits, MAE/RMSE, Diebold–Mariano test
